## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-18, drawn to a method for fabricating a thermal interface structure, classified in class 204, subclass 164.
  - II. Claim 19-21, drawn to an apparatus for forming a thermal interface structure, classified in class 422, subclass 186+.
  - III. Claims 22-24, drawn to an apparatus for forming a thermal interface structure, classified in class 422, subclass 186+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group I and either Group II or III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the

Art Unit: 1753

apparatus as claimed can be used to practice a process for aligning magnetic particles in a slurry.

3. Inventions of Groups II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different effects: the invention of Group II recites the use of a parallel capacitor and the invention recites a conveyor.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or III, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Attorney C. Steffey on June 26, 2003 on \*\*\* to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1753

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kishor Mayekar whose telephone number is (703) 308-0477. The examiner can normally be reached on Monday-Thursday.
